WINTER 2024 SALES FLYER

RELIABLE PEOPLE

Meet Josh Drury, the newest addition to our team as the National Sales Manager for Beverage. With many years of experience in the beverage industry, Josh brings a wealth of knowledge and expertise to our organization.

A dedicated Beverage and CO2 Account Manager like Josh can bring a number of benefits to our customers.

Firstly, having a dedicated point of contact for all their needs means that customers can rely on a consistent level of service and support. Josh will be able to understand their specific requirements and tailor our products and services to meet those needs.

Additionally, Josh extensive experience in the beverage industry means that he has a deep understanding of the challenges and opportunities that come with the industry. He is able to anticipate potential issues and proactively work with our customers to find solutions. This helps to ensure that there are minimal disruptions to our customers' operations and that they are able to meet their own production and delivery deadlines.

Furthermore, Josh's role as the CO2 Account Manager ensures that our customers will have a reliable supply of CO2 & beverage products, which is essential. He will be able to work with our customers to ensure they have the right amount of stock at all times, thus reducing any delay in production.

Finally, Josh's expertise in logistics and supply chain management means that he will be able to work with our customers to optimize their operations and minimize costs. By constantly looking for ways to improve efficiency, Josh can help our customers to increase their bottom line.

All of this means that having a dedicated Beverage and CO2 Account Manager like Josh Crambes allows our customers to focus on their core business, knowing that their beverage and CO2 needs are being taken care of by a highly experienced and professional team.

Complete Beverage Catalog

Everything you need for beverage & CO2. Same day shipping on in-stock items.

BEVERAGE CARBONATION SYSTEMS easyCarb 300, 550, 750 HF, & 1000

ONLY EASYCARB OFFERS:

- Newly Designed Faster Fill System – More Customer Deliveries per Day
- Greater Continuous and Peak Flow Rates – 100% Stainless Steel Beverage Vaporizer Coil
- Most Reliable Automatic Fill Shut Off – Designed and Vetted by Industry Experts
- Improved Labeling and Component Identification
- Color Coded Pressure Gauges Highlighting Operating Ranges
- **Newly Designed V-Shaped Legs and Removable Shipping Ring**
- Reconfigured User-Friendly Robust Plumbing Components
- Better Thermal Performance – Longer Product Hold Times, Less Venting

Valuable options to customize your tanks!

- All models available with 6-inch legs
- *Optional* Vent Fill feature available for all models
- *Optional* 120 volt and 240 volt electrical heaters available on EC550 models
- 120 volt adds 20 lbs/hr continuous flow
- 240 volt adds 40 lbs/hr continuous flow

CO2 TANKS FOR BEVERAGE CARBONATIONS

Ratermann Manufacturing, Inc. is excited to introduce a full line of beverage carbonation tanks for CO2. Like all of the products we carry, our tanks are backed by our **reliable service**. We want to provide you with a package you can feel 100% confident in.

TESTED AND SUPPORTED

At Ratermann, we provide a guaranteed quality control system that double checks every outgoing order. We fill test and NER test each easyCarb tank before it is shipped to ensure you are receiving a quality product.

For More Information on our easyCarb Tanks please give us a call at 1.800.264.7793
RMIORDER.COM

Ratermann's live support team is available to assist you with any questions or needs before, during and after your buying process.

QUALITY YOU CAN COUNT ON

"Our responsibility is to supply our customers with a bev-carb package that they can feel 100% confident in; a package that will work as it is designed. We want our customers to know our support doesn't stop after the tank is sold, our support is always there for them."

CO₂

It's as Easy as...1,2,3...

One...

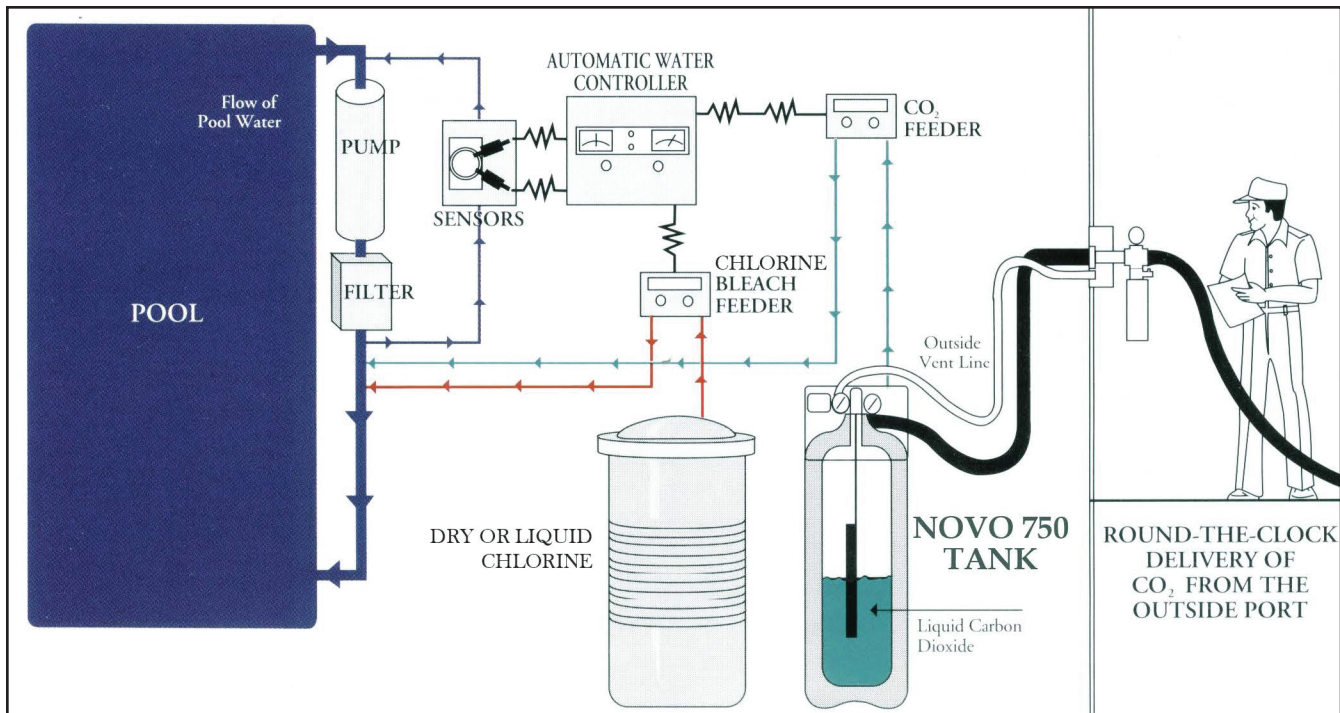

CO₂ is inexpensive and readily available. The aquatic industry is seeing a rapidly accelerating trend towards the use of CO₂. It's a cost effective replacement to reduce or replace muriatic acid at your pool.

Two...

The NOVO® cylinders make your water safer for bathers, less damaging to your equipment and minimizes the danger involved with the storage of handling acids as well.

Three...

Our unit is permanently installed. No need to move or change out tanks. It can also do the job of eight or more high pressure cylinders. Connects to your automated pool water controller so that the pH and Total Alkalinity (TA) level you selected are maintained.

RELIABLY EVERYWHERE.

CARBON DIOXIDE PRODUCTS Composite Piping

Duratec is an innovative compressed air and inert gas distribution system ideally suited for the demanding food and beverage industry and hospitality sector. Meeting NSF and FDA requirements, Duratec is a completely clean pipe and fitting system. Designed to be absolutely leak-proof, installed quickly and easily, and maintained cost effectively, Duratec saves you time and money.

Traditional metallic compressed air and inert gas systems are a main cause of unnecessary energy use and excessive wear and tear on equipment. The culprits? Corrosion and leakage at pipe joints and fitting connections which often go undetected until they're discovered during a detailed system audit.

Engineered to outperform traditional metal piping systems, Duratec pipe comes in long 100 foot or 300 foot coils, which significantly reduces the number of joints in your system. The Duratec system is secured with durable nickel-plated brass and stainless steel adapter fittings. All fittings feature double o-ring seals to ensure long term joint integrity.

Applications

- Inert Gas Distribution
- CO2 Distribution
- Microbulk Inert Gas Delivery Systems
- Plant Air
- Valve Actuation – Control Systems

Duratec Installation Tools

- Plastic Pipe Cutter
- 5 in 1 Beveling Tool

Part # CMP-PPC

Part # CMP-BT38-1

- 1/2", 3/4" and 1" sizes
- Operating Pressures 200psi at 73°F, 160psi at 140°F

NOTE: 3/8" size Tubing is **Not** PE-RT material and not FDA compliant. 3/8" size is HDPE material.

FEATURES & BENEFITS

Duratec reduces costs on a typical installation not only for materials but also for labour and transportation costs when compared to traditional materials. How? Duratec's lightweight construction and simple assembly procedures which include:

Ease of Handling Duratec is 75% lighter than the equivalent diameter of copper and SCH 40 carbon steel.

Quick Removable Connections Threading is not required. All joints have double o-ring seals and can be quickly assembled or disassembled. Easy on-site modifications and repairs can be made.

Quick Installation No special training or equipment is required to complete a Duratec system.

Fewer Fittings Duratec pipe comes in convenient 100 ft. and 300 ft. coils eliminating several joints and the need for threading, or soldering.

Flexible Yet Rigid Due to its composite structure, Duratec pipe can be easily bent by hand and will maintain its desired shape. This unique feature allows for straight, professional looking installation and eliminates sagging.

LOWER OPERATING COSTS

Due to Duratec's advantages over metal systems, it costs you less time, labour and money to keep a Duratec system in optimal condition.

Pressure loss means money loss Metal systems can lose pressure due to pin-hole leaks and leakage at connections, all of which result in increased energy costs. Duratec's high-quality construction, on the other hand, guarantees consistent pressure for years to come.

Smooth Interior Less friction means lower pressure drops and higher flow rates. This may allow for smaller pipe sizes to be used.

THE PERFORMANCE OF PLASTIC WITH THE STRENGTH OF METAL

EXTENDED LIFE

Duratec is designed not to rust, scale or pit. Once properly selected for the application and correctly installed, Duratec Airline Systems will provide years of maintenance-free service because they are:

Corrosion Resistant Duratec's tough outer PE-RT (Polyethylene of Raised Temperature) layer protects it against corrosion and deterioration and ensures long service life even in the most aggressive manufacturing environments. Its inner PE-RT layer meets stringent NSF and FDA requirements and is unaffected by inert gases. With a choice of long-lasting nickel-plated brass fittings or 316 stainless steel adapters, the system provides long-term performance superior to traditional metal piping systems.

Clean All Duratec pipe is packaged in cardboard boxes preventing contamination before use. The smooth PE-RT inner layer cannot rust, corrode or form loose scale. Clean air remains clean throughout the life of the system.

Safe Duratec's unique composite construction means that accidental impact or puncture of the pipe results in a safe, ductile mode of failure. Duratec pipe has been third-party tested and certified to stringent OSHA safety requirements, standards that guarantee safety comes first.

Duratec pipe and fittings provide top-notch performance. Rated for long term continuous operating pressures of 200psi at 73°F and 160psi at 140°F, Duratec pipe and fitting assemblies are also capable of sustaining quick burst pressures in excess of 800psi. This built-in safety factor ensures system performance and provides peace of mind for designers and facility managers.

Food Grade LCO2 Transfer Hose for CO2 & Beverage Applications NSF 51 Rated

RATERMANN'S LCO2 compatible hose will help you meet your **FOOD SAFETY MODERNIZATION ACT (FSMA)** requirements.

Our thermoplastic hose is specially designed for the transfer of liquid and gaseous carbon dioxide (CO2) for beverage applications. It is commonly used on small bulk delivery trucks as well as flexible lines from the restaurant wall-box to the liquid cylinders. The hose is specially formulated to perform well in temperatures as low as -40°F, and the proprietary core tube is plasticizer free and FDA compliant. Our unique bonding process guarantees excellent kink resistance, and the proprietary "Tuff-Skin" cover provides for superior handling and abrasion resistance.

Specifications

Nominal I.D.:	Maximum Working Pressure:
1/2 inch	2,000 PSI

Precision Cutter

- Saves time cutting tubes and hoses
- Special V-block ensures straight clean cut
- Cuts 1/4" to over 1" OD
- Even cuts Kevlar Lined Hoses.

Part #	Description
BVT-CUTTER	Precision Tube Cutter
BVT-CUTTER-RB	Replacement Blade
BVT-CUTTER-HLST	Belt Holster for Cutter

Push-In Tube Fittings

PROVIDES QUICK & CONVENIENT ASSEMBLY

Products are manufactured from safe, non-toxic materials meeting the requirements of the US FDA, ANSI/NSF-51, 61, and SK Zert.

Do not use this product where the ambient temperature or fluid temperature may exceed 180°F.

Maximum operating pressure -40°F to 68°F is 230 PSI / 149°F is 150 PSI.

Fittings listed fit the following tubings:

- 1/4" O.D. fits 08H05-154
- 5/16" O.D. fits 08H05-247
- 3/8" O.D. fits 08H05-115
- 1/2" O.D. fits 08H05-116

ELBOW

Part #	Description
PI-90-OD140D14	1/4" O.D. x 1/4" O.D.
PI-90-OD140D38	1/4" O.D. x 3/8" O.D.
PI-90-OD380D38	3/8" O.D. x 3/8" O.D.
PI-90-OD380D12	3/8" O.D. x 1/2" O.D.
PI-90-OD120D12	1/2" O.D. x 1/2" O.D.

TEE

Part #	Description
PI-TEE-OD14	1/4" O.D. (ALL)
PI-TEE-OD380D140D14	3/8" x 3/8" x 1/4" O.D.
PI-TEE-OD38	3/8" O.D. (ALL)
PI-TEE-OD120D120D38	1/2" x 1/2" x 3/8" O.D.
PI-TEE-OD12	1/2" O.D. (ALL)

PUSH-IN SHUTOFF

Part #	Description
PI-SO-OD14	1/4" O.D.
PI-SO-OD38	3/8" O.D.
PI-SO-OD12	1/2" O.D.

END STOP

Part #	Description
PI-ES-OD14	1/4" O.D.
PI-ES-OD38	3/8" O.D.
PI-ES-OD12	1/2" O.D.

CROSS

Part #	Description
PI-X-OD14	1/4" O.D. (ALL)
PI-X-OD38	3/8" O.D. (ALL)
PI-X-OD12	1/2" O.D. (ALL)

MALE PIPE ADAPTER

Part #	Description
PI-A-M140D14	1/4" MPT x 1/4" O.D.
PI-A-M140D38	1/4" MPT x 3/8" O.D.
PI-A-M380D38	3/8" MPT x 3/8" O.D.
PI-A-M380D12	3/8" MPT x 1/2" O.D.
PI-A-M120D38	1/2" MPT x 3/8" O.D.
PI-A-M120D12	1/2" MPT x 1/2" O.D.

FEMALE PIPE & FEMALE FLARE ADAPTERS

Part #	Description
PI-A-F140D14	1/4" FPT x 1/4" O.D.
PI-A-F140D38	1/4" FPT x 3/8" O.D.
PI-A-FFL140D14	1/4" FFL x 1/4" O.D.
PI-A-FFL140D38	1/4" FFL x 3/8" O.D.
PI-A-FFL380D38	3/8" FFL x 3/8" O.D.

UNION

Part #	Description
PI-U-OD140D14	1/4" O.D. x 1/4" O.D.
PI-U-OD140D38	1/4" O.D. x 3/8" O.D.
PI-U-OD5160D38	5/16" O.D. x 3/8" O.D.
PI-U-OD380D38	3/8" O.D. x 3/8" O.D.

PI-LOC-OD14	1/4" O.D. Tube
PI-LOC-OD38	3/8" O.D. Tube
PI-LOC-OD12	1/2" O.D. Tube

Stainless Steel Stepless Clamps

- Manufactured of 304 grade stainless steel for extended durability and increased corrosion resistance
- Tongue-in-groove design provides uniform pressure and gapless leak-free seal
- Burr-free edges to protect parts and to prevent injury during assembly
- The clamp ears adjustable crimp range compensates for component tolerances and applied pressure

Brass Check Valve

Part #	Description
BFT-CVM14MFL14	Brass Check Valve, 1/4 M NPT x 1/4 M Flare

WARNING: Products in this catalog can expose you to chemicals including lead which is known to the State of California to cause cancer, birth defects or reproductive harm. For more information, go to <https://www.p65warnings.ca.gov>

CO2 THERMOPLASTIC LOW-TEMP PIGTAILS 2,750 PSIG MAWP Rated

Hoses for the Following Gases

2750 PSIG MAWP Rated – Plated Carbon Steel End Fittings

These pigtails are constructed with a Polyester low temperature tube and cover. Each assembly is tested to 1 1/2 times MAWP. Branded with part number, size and MAWP. Meets SAE 100R7 specifications.

Style Specifications

Not recommended for oxygen service. Meets SAE 100R7 specs

Liner: Low temperature Polyester

Reinforcement: Polyester braid

Cover: Pin-pricked Polyester

Temperature: -65° F to +212° F

WARNING: Products in this catalog can expose you to chemicals including Lead which is known to the State of California to cause cancer, birth defects or reproductive harm. For more information, go to <https://www.p65warnings.ca.gov>

Hose Reel for Thermoplastic Hoses

Part # BEV-REEL

Hose Reel to be Installed on Liquid CO2 Delivery Vehicles

BEV-REEL with 1/2" full-flow Super Swivel with low temp Buna seal and FDA grease. Spring retractable heavy duty painted reel will handle up to 100 feet of 1/2" hose. 2000 PSIG Rated.

CO2 Transfer Hoses 450 PSIG MAWP CO2 Pump

A lightweight, yet durable rubber hose manufactured specially for the demands of Carbon Dioxide

Transfer hoses are manufactured specifically for the demanding requirements of CO2 liquid and vapor transfer. Unlike rubber hydraulic hose that is constructed with carbon steel reinforcing, these hoses are reinforced with stainless steel braids to resist carbonic acid – the result of CO2 and moisture combination. In addition, our pricked cover solves the problem of bubbling that the covers of hydraulic hoses have experienced. These hoses will be dramatically more flexible in CO2 transfer than standard rubber hoses due to a specially blended tube rated to minus 65° F. The two-braid construction also offers much better kink resistance than comparable single braid products.

SPECIFICATIONS

Liquid / Vapor CO2 Transfer Hose

- Tube** Special Neoprene blend rated for -65° F
- Reinforcement** Two stainless steel braids
- Cover** Special Neoprene blend. Black with blue Mylar
- Temperature** -65° F to +180° F
- Pressure Range** 450 PSIG MAWP
- Branding** Blue Mylar
- CGA Fittings** Brass sleeve, nut, and dust caps available
- Other Fittings Available** Female NPT brass bar-stock fitting with aluminum crimp collar

CO2 ACCESSORIES Automatic Changeover Manifold Ball Valves

Utilizes Two Compensating Regulators

This Automatic Changeover Utilizes two compensating regulators to insure a seamless changeover from empty cylinder to full cylinder.

Features:

- For use with all inert gases
- Accurate and stable
- Changeover utilized two patented compensating regulators ensuring accuracy
- Smooth and silent changeover
- Quick and simple installation
- Durable and compact
- Ideal application for: Beverage Industry (fountain and keg service); Welding (uninterrupted shield gas flow for automated systems); Laboratory (ideal for application requiring a stable constant flow without interruption)

Specifications:

Max Inlet PSIG 3,000 PSIG
Size 5" W x 10" H x 2" D
Outlet Pressure 125 PSI - 170 PSI

Image shown does not contain pigtails
 Part # MAN-ACDR-NOPIGTAILS

Typical Setup: Can be used with manifolds on either side or on both inputs

Part #	Description
MAN-ACDR	Automatic Changeover Manifold
MAN-ACDR-320-24	Automatic Changeover Manifold, with 24" Pigtails for Carbon Dioxide
MAN-ACDR-320-36	Automatic Changeover Manifold, with 36" Pigtails for Carbon Dioxide
MAN-ACDR-580-24	Automatic Changeover Manifold, with 24" Pigtails for Inert
MAN-ACDR-580-36	Automatic Changeover Manifold, with 36" Pigtails for Inert

WARNING: Cancer and Reproductive Harm – www.P65Warnings.ca.gov
 For further information on Proposition 65, please go to www.oehha.ca.gov/proposition-65

Completely Automatic

This is a completely automatic gas cylinder changeover system that is non-electric, fool-proof and designed for easy installation and everlasting performance.

Installation Made Easy

- Simply fasten the Changeover to a wall with the outlet about 10" above the gas cylinders to be uses.
- Connect your regulator inlet to the outlet of the changeover.
- Connect the hoses to the cylinders being used.

After Installation, simply turn on the cylinders (or bank of cylinders) that will be used FIRST. This locks in this bank of cylinders.

Then turn on the other bank of cylinders which will be used SECOND. The automatic Changeover will automatically switch to this side when the pressure in the First bank drops to 185 psi (+/- 15 psi).

Materials of Construction

- Valve Body – 7075-T6 Aluminum
- Spool Valves – Brass, Nickel Plated
- O-Rings – EPDM

Weight & Dimensions

3"W x 5.5"H x 1.25"D – 5 lbs.

Inlet Pressure

3000 psig max

Changeover Pressure

185 psig +/- 15 psig

Flow Rates

- @ 2000 psig inlet: 2625 cfh
- @ 250 psig inlet: 525 cfh

CO2 CYLINDER ACCESSORIES Semi-Automatic Switchover Manifold

Semi-Automatic Switchover Manifold

Prevents downtime by automatically switching gas supply from the primary cylinder bank to the reserve cylinder bank. The user resets the primary bank by turning the knob. Manual adjustment of the individual regulators is not required.

Features:

- Wall mounting Panel
- Maximum inlet pressure 3000 PSIG
- Delivery pressure 0 – 125 PSIG
- Inlet/Outlet 1/4 NPT
- Includes Post Sintered stainless steel braided pigtails.
- CGA Nut and Nipples with Check Valves

Optional Accessory

- High Pressure Alarm System, 3000 PSIG
Pt # MSO-SA-ALARMHP

Post sintered hoses are included as standard. Other hose options are available upon request.

Transfill Pump with Scale

Cylinder Hanging Stand*
Part # TFPSA-CYLHKIT

Pt # TFPS-CO2

Features

- Liquefied Carbon Dioxide and Nitrous Oxide fill station
- Complete system, includes pump, scale and hose sets
- Excellent for on-demand filling of customers cylinders
- Patented double-ended pump with 9:1 ratio, fills at rate of 4 lbs. per minute
- Momentary fill button ensures operator attention
- "Economizer" fill valve bleeds pressure to cylinder while maintaining pressure in pump
- Lube free operation
- Powered by shop air or remaining pressure in spent cylinders

Specifications

Part Number: TFPS-CO2
 Drive Air Required: 90-140 psi
 Drive Ratio: 9:1
 Fill Rate: 4 lbs/min
 Pump: Liquid gases only
 Design: Aluminum Body – Heat Treated Stainless Steel Piston

Applications

- HVAC service cylinders
- Nitrous Oxide cylinders
- Paintball cylinders
- Class 2 fire extinguishers

Transfill Pump with Scale and Accessories

Part #	Description

DRY ICE
ON DEMAND, AS YOU NEED IT

Dry Ice Machine

Pt # DIM-DW1

for Cryogenic Liquid Cylinders

You will need a Liquid Cylinder (350psi Cryotank) of Liquid CO2.

Attach to the Liquid outlet of your Bulk CO2 tank using an Adjustable wrench. Open the cylinder valve and direct the nozzle into a container.

One way to pack dry ice is by packing it into a small cardboard box. Pack it down with a 2x4, and tape it shut. Put the cardboard box into your cooler or insulated container.

Makes Dry Ice snow at the rate of 1 + lbs. every two minutes.

for High Pressure Tanks

CO2 tank needs to be a liquid withdrawal tank that has a dip tube inside the tank so liquid comes out to produce dry ice.

Attach to the 0 to 70 lb (high pressure) Dip Tube/Siphon CO2 Cylinder using an Adjustable wrench. Open the cylinder valve and direct the nozzle into a container.

Another way to use your dry ice, is to spread a couple layers of newspaper on a hard surface. Dump the Dry Ice from the bag or container onto the newspaper. Wrap your dry ice like a burrito in the newspaper and tape it shut. Place in cooler.

Makes Dry Ice snow at the rate of 1 lb. every two minutes.

⚠ WARNING: Products in this catalog can expose you to chemicals including Lead which is known to the State of California to cause cancer, birth defects or reproductive harm. For more information, go to <https://www.p65warnings.ca.gov>

Manual CO2 Cylinder Changeovers

SHW-P625-19N9-38	Sherwood GV Series Plug Style Safety 4000 PSI

Replacement fusible plugs also available. Old cap style available upon request. Call Customer Service for details.

Cylinder Siphon Tubes

Siphon tubes are constructed from 3/8" type "K" copper tube. Each tube is fitted with a 1/4" male NPT brass fitting for easy attachment to most brass valves on the market today. Standard length is 53" OAL to fit most 250-300 cu. ft. cylinders. All ends are cut at 45° angle to allow for unrestricted flow.

Stainless Steel siphon tubes are available for higher purity gases. Custom sizes are available upon request. Call Customer Service for details.

CST-C26	Standard Siphon Tube, 26" OAL

CO2 PRODUCTS Carbon Dioxide and Gas Purification

Improve Carbonation

Advanced technology now provides a filter for both solid particulate and oil mist reduction. The excellent specifications for solid particulate reduction, oil aerosols and vapor reduction translate into increased carbonation and efficiency. Provides 40 times more solid particulate holding capacity than conventional filters.

Applications include beverage carbonation and brewing operations, gas packaging, injection molding, processing, medical uses, refrigeration / chilling systems and a host of others to meet your needs.

Our modular filter design means less than half of the installation time of conventional systems plus reduced maintenance over years of use. This unique system utilizes nylon construction and will withstand high pressure – yet maintain a low pressure drop. And you'll appreciate our filter performance guarantee to enhance many years of dependable use under the most rigorous conditions.

Materials of Construction:

Filter Media	Hollow Carbon
Housing	Polypropylene
Head	Proprietary reinforced nylon

Cartridge Specifications and Performance Data

Maximum Dimensions	14" x 9" x 23"
Micron Rating	0.5
Initial ΔP (psi) at Flow Rate (gpm)	8 psi @ 150 scfm
Temperature Rating	40° to 100° F

Applications:

- CO2 & GAS PURIFICATION
- Beer & Beverage Carbonation
- Bottling and brewing
- Gas Packaging
- Chilling, Quick Freezing & Refrigeration
- Fire Extinguishers
- Medical & Surgical Uses
- Critical Instrumentation
- Industrial CO2 Laser Cutting & Welding
- Blending, Foaming & Injection Molding
- Micro-Elements
- Ceramics Processing
- Holography

Benefits:

- One Filter does it all
- No pre filter required
- Low pressure drop
- Increase Carbonation

Features:

- Ultra High Porosity Carbon with Micro-Structure
- Nylon construction withstands high pressure
- Modular filter design for up to 80% less installation time!
- 40 times more solid particulate holding capacity than conventional filters!

Specified to:

- Provide 100% 0.5-1 Micron Solid Particulate Reduction
- Provide 100% Oil Aerosols and Vapor Reduction at 61 mg/m³
- Increase Carbonation

CO2 CYLINDERS Aluminum Cylinders Painting & Stamping

Carbon Dioxide Specifications

- Service Pressure:** 1800psi/124bar
- Specification:** DOT-3AL & TC-3ALM designed ISO design cylinders are available
- Alloy:** Manufactured from high strength aluminum alloy 6061-T6
- Threads:** 5LB & larger supplied with 1.125-12 UNF thread, all others with .750-16 UNF thread
Other thread sizes available upon request
- Markings:** As required by specification, inclusive of tare weight
Additional markings available upon request
- Finish:** Standard finish is brushed body with unpainted crown
- Graphics:** Logos or labels in silkscreen or Duragrafix available upon request

IDEAL FOR
DISPENSING
CARBONATED
SOFT DRINKS,
BEERS, LAGERS
AND OTHER
BEVERAGES.

NOTE: Cylinders have D.O.T. approval to be filled with several gases including NITROGEN, BLENDED GAS, etc. Check with your local filler or welding supply. Fillable up to 1800 PSI

Cylinder Painting and Stamping for Easy Identification

Call us today to have your cylinders **PAINTED and STAMPED** for easy identification.

- 1 – Choose Your Style & Color
- 2 – Choose Your Stamp – Use any combination of letters and numbers

Aluminum Industrial Cylinders

Preferred cylinder package for specialty gas, exotic gas and high-purity gas mixtures.

Features

- Lightweight, high strength 6061-T6 alloy
- Corrosion-resistant interior and exterior
- Stringent internal cleaning process ensures compliance with customer specifications
- Available with straight or tapered threads
- Uses Industrial CGA540, 580 or comparable valve, sold separately
- Wide color range available, including a durable, brushed exterior finish

Manufactured to DOT and TC requirements

- U.S. Department of Transportation (DOT) 3AL
- Transport Canada (TC) 3ALM
- Every cylinder inspected and tested by DOT- and TC-authorized independent agency
- Cycle-tested in excess of 100,000 cycles at service pressure
- Minimum burst pressure tested to 2.5 times service pressure without failure

Note:
Cylinder colors may vary from photo.

20 lb. Cylinder Storage / Transportation Racks

FEATURES:

- Meets DOT Regulations for safe and efficient storage and transportation of compressed gases when used with E-Track Strap
- Rigid welded frames construction
- Racks are forkliftable from front or side and are stackable
- E-Track Sides to use with Logistics E-Track Straps

Part # CSC-STR20-16

20 lb. Cylinder Storage / Transportation Racks

Part #	Description	Overall Dimensions	Empty Rack Weight

Standard Surface Mount Fill Box

Complete with CO2 Fill Nipple, 3/8" vent elbow and lockable catch or turnkey thumb lock.

Part Number	Connection
FB-SUR-58	5/8" Flare
FB-SUR-12	1/2" FPT
FB-SUR-34	3/4" FPT

CO2 Fill Box Overview

- Durable 16 Gauge 304 Stainless Steel Construction
- Surface or Flush (recessed) Mount Fill Boxes
- Extension Boxes for Fill Lines Installed on Exterior Building Walls
- Field Replaceable CO2 Fill Plates
- Lockable or Keyless Fill Box Closures
- Available CO2 Nipples:
 - 5/8" Flare x Liquid CO2 Fill Nipple
 - 1/2" FPT x Liquid CO2 Fill Nipple
 - 3/4" FPT x Liquid CO2 Fill Nipple

"Classic" Flush Mount Fill Box

Hidden from view, this recessed fill box makes for an architecturally pleasing installation, while allowing easy access for fill and maintenance.

Part Number	Connection
FB-FLS-58	5/8" Flare
FB-FLS-12	1/2" FPT
FB-FLS-34	3/4" FPT

Standard Surface Mount Fill Box with Removable Plate

The removable plate makes for an easier installation or quick CO2 Fill Nipple replacement.

Part Number	Connection
FB-SUR-RP-58	5/8" Flare
FB-SUR-RP-12	1/2" FPT

Keyless Standard Surface Mount Fill Box

Our integrated keyless closure system reduces unnecessary service calls due to an open fill box.

Part Number	Connection
FB-SURKL-58	5/8" Flare
FB-SURKL-12	1/2" FPT
FB-SURKL-34	3/4" FPT

Flush Mount Conversion Plate

This stainless steel plate is used to convert a "Classic" Flush Mount to a Standard Surface Mount Fill Box installation (*fill box sold separately*).

Surface Mount Cover Plate NOT SHOWN

A stainless steel plate that covers the opening left by a Standard Surface Mount Fill Box that has been removed.

Part Number	Description
FB-FLS-CONPLT	Flush Mount Conversion Plate
FB-SUR-COVPLT	Surface Mount Cover Plate

Standard Surface Mount Fill Box Extension Kit

This fill box combination allows the ability to run the fill and vent lines in any direction along the outer building wall. The kit includes the Standard Surface Mount Fill Box, 1/2" 90° Fitting and mounting screws.

Standard Surface Mount Fill Box Extension Only

Compatible with the Standard Surface Mount Fill Box (*Part # FB-SUR-12 sold separately*). The 1/2" 90° Fitting and mounting screws are included.

Part Number	Description
FB-EKKIT-SUR-12	Standard Surface Mount Fill Box Extension Kit
FB-EX-SUR	Standard Surface Mount Fill Box Extension Only

Dry Ice Poly Boxes

Dry Ice Poly Boxes

Dry ice poly boxes provide a wide variety of USDA approved insulated dry ice storage boxes for use with dry ice pellets, discs, slices or blocks. Our line of high-quality polyethylene storage containers are designed specifically for holding and transporting items that require dry ice or wet ice. The boxes are built to withstand the extreme cold temperatures of dry ice while retaining the durability needed for everyday operation.

FEATURES

- Made of double-wall polyethylene that is filled with urethane foam insulation
- Virtually unbreakable in daily operations
- Lightweight and durable for easy mobility
- Maintains critical temperatures for your laboratory specific materials
- Ideal for CO2 cleaning, frozen food, medical & laboratory applications
- Casters are available for easy maneuverability
- Hinged lids with latches
- Available with or without drains
- Optional casters available on some models

Part # TM-TSP-11
sold with or without casters

Remote Oxygen Depletion Safety Alarm MTR-RAD-0002

Series MTR-RAD-0002 Remote Oxygen Depletion Safety Alarm

The MTR-RAD-0002 Remote Oxygen Depletion Safety Alarm is designed to detect oxygen depletion in enclosed spaces and to warn occupants of low oxygen levels. Low concentrations of oxygen (O₂) in confined spaces are dangerous, and may lead to health problems ranging from headaches and fatigue to asphyxiation and death. This monitor has both audible and visual alarms which activate when the O₂ concentration is lower than the pre-set alarm levels. Detection of low levels of O₂ will also activate relays that can be used for a fan or air-handling system to ventilate the confined space and improve O₂ concentration in the area.

The first audible and visual alarms will activate when the oxygen concentration falls below 19.5% per OSHA requirements.

Features

- Large digital LCD display
- Separate SEU (Main Sensor) and RDU (Remote Display)
- 3 Relay outputs to control ventilation devices
- 4-20mA Outputs - O₂: 0~25%, Temp: 32 to 122° F
- Audible and visual indications at 3 alarm levels
- Ability to add strobes for additional indication
- Automatic barometric pressure compensation

Accessories

- CM-1026 I Dual Strobe Add On Kit
- CM-0126-5,6 I Strobe Tower Add On Kit
- RAD-0022I Additional Remote Display

Applications

- Cryogenics
- Cryotherapy
- Food Production Facilities
- Process Cooling
- Any enclosed space storing inert gases

Remote Oxygen Depletion Safety Alarm	
Range	0 - 25% display
Display Resolution	0.1%
Accuracy	Better than 2%FS
Temperature Range	32°F to 122°F (0°C to 50°C)
Response Time	O ₂ : <2min by 90%
O ₂ AL1	18.0%, 18.5%, 19.0%, 19.5%, 20.0%. The default AL1 is 19.0%.
O ₂ AL2	16.0%, 16.5%, 17.0%, 17.5%. The default AL2 is 17.0%
Operating Temperature	32°F to 122°F (0°C to 50°C) For Storage: -4°F to 140°F (-20°C to 60 °C)

Electrical and Mechanical Specifications	
Power Supply	Output: 12VDC, 2000mA.
Power Input	100~240 VAC, 50/60Hz, 0.6A
Power Consumption	6VDC (5.4V~7.0V), recommended capacity is 12AH
Relays	Peak current for each relay < 2A @ 30VDC or 250VAC & Relay configuration: SPDT
4-20mA Outputs	CL01:420mA O ₂ : 0~25% CL02:420mA Temp: 32 to 122° F (0-50°C)
Mounting Height	60-72 inches from floor height
Model	
MTR-RAD-0002	Remote Oxygen Depletion Safety Alarm

Remote CO2 Storage Safety Three Alarm Monitor MTR-RAD-0102-6

Series MTR-RAD-0102-6 Remote CO2 Storage Safety Three Alarm Monitor

The Remote CO2 Storage Safety Three Alarm Monitor detects carbon dioxide (CO2) levels in ambient air. This protects employees and guests from potentially hazardous gas concentrations. The MTR-RAD-0102-6 features audible and visual alarms that can trigger three individual relays. These relays can trigger third-party devices like exhaust systems and fire panels. Ensure the safety of your employees and guests as well as the compliance of your facility with the CO2 Storage Safety Three Alarm Monitor.

Features

- LCD display clearly indicates current CO2 level in PPM or % and temperature
- 3 alarms/relays
- Relays can automatically control ventilation fans or signal a fire alarm panel
- Meets NFPA, IFC, and NBIC requirements
- Meets OSHA and NIOSH TWA standards
- IP54 Enclosure
- UL listed for compliance

Applications

- Restaurant & Food
- Breweries and Wineries
- Beverage Dispensing
- Agriculture
- Safety

Accessories

- SV-1028 I Valve

Pt # MTR-RAD-1026-6

Remote CO2 Storage Safety Three Alarm Monitor

CO2 Measurement Range	0-5% (0-50,000 ppm)
CO2 Measurement	NDIR (Non-dispersive Infrared)
Alarms	5,000 TWA, 1.5% (user configurable), 3% (user configurable)
Measurement Interval	2 seconds (0.5 Hz)
Operating Temperature	32-122° F (0-50° C)
Calibration	Zero with Nitrogen or Factory Calibration
Connections	Standard RJ45
Sensor Life Expectancy	>15 years

Electrical and Mechanical Specifications

Power Supply	110-220 VAC 50/60 Hz to 12 VDC power adapter
Power Input	4.5-5.25 VDC
Power Consumption	3 Watts
Hard-Wired	24 VDC hard-wired option (cable included)
Output	4-20 mA

Alarms & Relays

Response Time	<60 seconds
Alarm Level	88 dB
Relay Power	Peak current <2A @ 30 VDC or 250 VAC, SPDT
Relay Color Coding	Red & White: Normally Open, Blue & White: Normally Closed

Series MTR-RAD-0102-6 Dual Strobe Add-On Kits

These strobes provide a bright, flashing indicator for any of our CO2 or Oxygen Storage Safety Alarms. These 100 cd strobes clearly indicate the alarm level to anyone in the room.

One strobe connects to the sensor display and one to the remote display via an Ethernet cable (included). No additional wiring is required. Strobes flash when Alarm 1, 2, or 3 is triggered. Does not require an additional power source.

Pt # MTRCM-1026

Features

- Strobes are connected to the main and remote units with standard RJ45 connections instead of them being controlled by the relays
- Controlled by the relay outputs on RAD sensor unit
- Input voltage: 6 to 12VDC
- Heavy duty 18-gauge leads
- Easily connected to all security systems

Specifications

- 6' ft Ethernet cables included
- Alarms:
 - 5,000ppm TWA
 - 1.5% CO2
 - 3% CO2

Applications

- Restaurants
- Breweries
- Agriculture
